

The HygroVino humidifier is a real complement for cellars that are naturally too dry or equipped with an air conditioner without a built-in humidifier.

This small device with its modern design works independently of any other system to ensure maximum protection of the wine cellar thanks to the expertise of Friax Industrie.

Humidified and filtered air

Thanks to its anti-microbial filter, the HygroVino humidifier delicately humidifies wine cellars with clean air.

Unlike ultrasound technology, its operation is safe for the cellar. Water does not need to be treated before use.

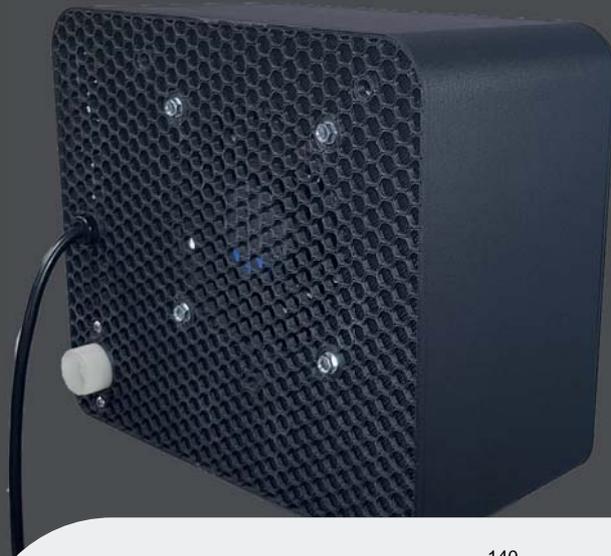

Simple and sustainable design

The humidifier is connected to the house water network. Once plugged in, it is ready to work. Fixed to the wall or placed on a shelf, it always maintains the required humidity . No drain connection is necessary.

HygroVino is based on an eco-responsible design with fully recyclable materials that do not fear corrosion. The humidification principle used is energy efficient, it does not add heat to the cellar like electric resistance systems.

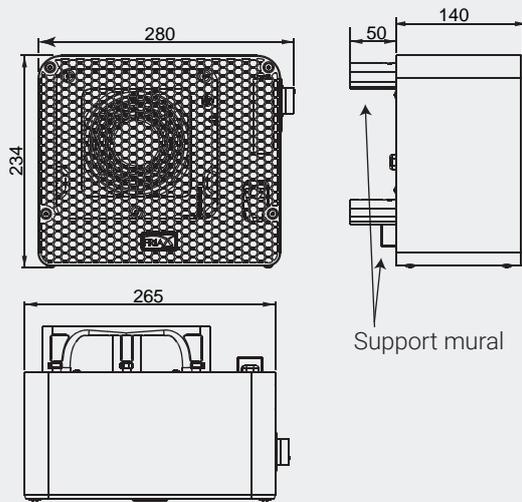

HYGROVINO 2.4

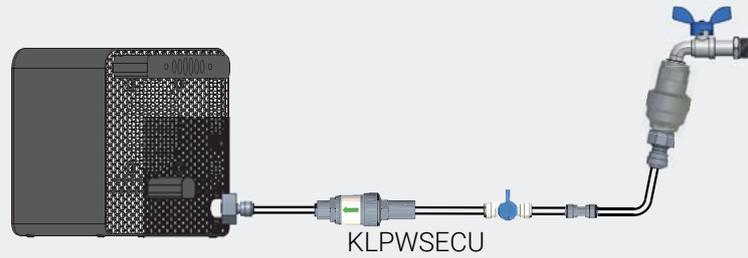

The black color of its modern design can be personalized on request.

The HygroVino humidifier works in all wine cellars. It is the ideal complement for upgrading a cellar equipped with a Friax Genesis air conditioner model (= without integrated humidification).

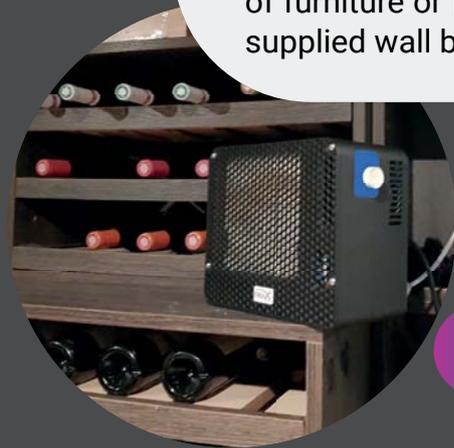

For cigar it can be used as a humididor.

HygroVino can be installed on a piece of furniture or fixed to the wall with its supplied wall bracket.

The KLPWSECU connection kit, available as an accessory, simplifies installation and limits the water pressure on the device to its optimum value.

Humidifier for Wine Cellar

HYGROVINO SLIM 2.4

The slim version of HygroVino reinforces the humidification of Friax Céos or Vintage air conditioners when they are used in cigar cabinet applications (Humidor).

The cedar wood often used, very absorbent, requires a reinforced treatment of humidification.

Connected to the regulation, it automatically manages its humidity supply coupled with that of the air conditioner.
